Continuation of 2. NOTE: a) Applicants state that newly proposed claim 33 includes the subject matter of claims 1 and 11 "as suggested by the examiner". However, the examiner never suggested this. In fact, it is pointed out that claim 11 was canceled by applicants prior to final rejection. Accordingly, it has not been properly advanced as to why new claim 33 is considered patentable over the prior art. Further, it appears that not all limitations from finally rejected claim 1 have been included in new claim 33. For example, note that there is no longer a recitation pertaining to "narrow" sides of the panels as was present in claim 1, line 2. In view of the above, the newly presented claims raise new issues that require further consideration and/or search.
